Web Developer

Strong detail-oriented skills and a passion for continuous learning gained from an education in finance and a background in business. Brings a fresh perspective and positive approach to software development. Driven to blend accounting experience with training in Full Stack Web Development from Northwestern to pursue continuous improvement.

Applications Built

Bookworm | <https://bookclubs.herokuapp.com/>

- Helping users attain their goal of reading more through building connections. Users sign up, create groups and invite others who are interested in forming a book club. Groups have books posted for users to read and keep everyone on the same chapter. Groups also allow users to post and talk about what they are reading which allows the book club to be run fully online. Developed with the MERN stack.

Bark | <https://bark-book.herokuapp.com/>

- An application to build a community of dog lovers around certain breeds of dogs. Users sign up, create a profile, and register their dogs which allows them access to the groups around those dog breeds. Developed with NodeJS, Express, Handlebars, CSS and MySQL.

Plan Easy | <https://smushed.github.io/PlanEasy/>

- A single page application for users to fill out a calendar indicating their free time. The app pulls other users free time from a database then compares it to the current user's free time. This allows the user to search events on that time. Developed entirely with Javascript, HTML, CSS and Firebase.

Professional Experience

Performance Trust Capital Partners | AP/AR Analyst

06/17- Present

- Responsible for all Payables and Receivables transactions within the business
- Deliver weekly and monthly reports for business leaders

Parts Town | Financial Analyst

01/17- 06/17
